

Products for the food & beverage, canning and bakery industry

Industry	Products	Type	Application
Food & beverage	Berumoly P 80 Spray	Grease dispersion	Transport chains; cross-link chains, power and free transport systems even in presence of hot and cold water and steam (up to +150°C). Extended relube intervals, emergency running characteristics.
	Berufluid 125	Synthetic, semi-fluid chain grease, food grade	Transport chains, control/timing chains etc. Resistant to cold and hot water, and steam (up to +120°C). No fling-off. Noise reducing.
	Berufluid 126	Synthetic semi-fluid chain grease dispersion, food grade	Transport chains, cross-link chains, power and free transport systems even in presence of cold and hot water and steam (up to +120°C).
	Berulub Sihaf 2	Grease	Special grease for valves with sealing elements of EDPM rubber.
	Berufluid OP 2	Synthetic oil	Chains in high temperature areas
	Berutox VPT 64-2	Grease	Bearings in high temperature areas
Canning industry	Berutox M 21 EPK	Grease	High temperature bearings on sterilisers, pasteurisers, bearings and other components on canning and closing machines.
	Bechem-Rhus Longlife LF	Grease – food grade	See “Food & Beverage Industry”
 Sonderschmierstoffe <i>Special lubricants</i>		<i>Blatt:</i> <i>Datum:</i> <i>Name:</i>	

Products for the food & beverage, canning and bakery industry

Industry	Products	Type	Application
Food & beverage	Bechem-Rhus FA 37	Grease – food grade	Plain and anti-friction bearings in food processing plants. Neutral odour and taste.
	Bechem-Rhus FA 46	Grease – food grade	Application similar to FA 37, but higher apparent viscosity
	Berulub FB 19	Grease – food grade	Application similar to FA 37, but used when “longlife” lubrication is required.
	Berulub FU 5	Grease	Highly loaded, non-ferrous components as well as hot and cold water taps/fittings.
	Berusynth VPA 13	Synthetic hydraulic fluid	Hydraulic systems at extremely low ambient temperatures, e.g. forklifts in cold storage facilities.
	Berusynth GP 68–150–220–320–460	Synthetic gear oils	Gearboxes and worm gear drives working at extremely low ambient temperatures, e.g. cold storage facilities.
	Berulub Spray w+b	Pharmaceutical white oil (DAB9)	Mechanisms on wine bottling closing machines (corks). Manipulators of labelling machines (mineral water bottling). General lubrication of moving parts.
	Berusil P 140	Silicone oil	Lubrication of guides, slides etc, Mould release agent – chewing gum processing. Prevent icing of deep freezers and cold storage facilities.
	Berufluid 144	Synthetic chain fluid non-toxic	Transport chains in chocolate machines (cooling section). Chain at medium speed in cold storage plants.
